

Search and Rescue Modules

The following Modules are broken down for training and testing purposes.

These will be repeated throughout the year so if anyone joins during one module, they can carry on and the modules missed will be repeated later.

There will be an exam at the end of each module with a 70% pass. This will be reviewed every two years.

Once all modules are completed successfully, a certificate of qualification in Ground Search and Rescue will be issued.

Until certified, a member may participate in a search, under the guidance and discretion of an officer or qualified person if an officer allows.

Module 1:

Ground Search and Rescue
Search
Equipment

Module 2:

Communication
Training
Navigation

Module 3:

Human Factors
Environment
Legal Issues in Search and Rescue
